# 7THEURL 

AUSTRIAN PREMIUM TIMBER ${ }^{\circledR}$

## PRODUCTS

## C)닐 LAMINATED TIMBER

## THEURL CLEVER SOLUṪIONS MORE THAN STANDARD

The challenging living conditions in the mountains strengthen the resilience of the spruces. Spruce wood is therefore the perfect material for our glued laminated timber production. Easy workability and high strength are the key characteristics and qualities of glued laminated timber.

## GLUED LAMINATED TIMBER

THEURL glued laminated timber is made of at least two lamellas. The load capacity is much greater than that of conventional timber, due to the layered structure. Another quality characteristic is the selected knotless wood, which is glued parallel to the fibre and planed on four sides, resulting in aesthetically pleasing functional components. The automatic testing of each individual lamella is standard. The exact strength class is determined by the Microtec GOLDENEYE, pursuant to Önorm EN 14081-1.

ORDER-RELATED JUST-IN-TIME PRODUCTION

## GLULAM CEILING ELEMENTS

THEURL produces ready-to-fit ceiling elements with various profiles Dimensional accuracy and perfect surfaces help to reduce construction time and costs.

| Quality: | GL 24h |
| :--- | :--- |
| Standard dimensions |  |
| Height: | 40000 mm , maximum width 1200 mm |
| Thickness: | $80-280 \mathrm{~mm}$ |
| Length: | $6-18 \mathrm{~m}$ |

## Glulam elements, single groove, type 1

 Covered dimensions |= invoiced dimensions): $600 \mathrm{~mm} \mid$ Groove: 20 mm

Glulam elements, single groove and rabbet joint, type 2

Glulam elements, double tongue and groove, type 3

Covered dimensions: 580 mm | Invoiced dimensions: 600 mm | Groove: 14 mm

Glulam elements, double tongue and groove with rabbet joint, type 4

Covered dimensions: $580 \mathrm{~mm} \mid$ Invoiced dimensions: $600 \mathrm{~mm} \mid$ Groove: $14 \mathrm{~mm} \mid$ Rabbet above: $20 \times 40 \mathrm{~mm}$ and $20 \times 50 \mathrm{~mm}$

Glulam elements, with rabbet joint, type 5

| Thickness $80 \quad 100 \quad 120$ |
| :--- | :--- | :--- |
| Covered dimensions l= invoiced dimensions): 600 mm |

Covered dimensions I= invoiced dimensions): 600 mm
Rabbet above: $20 \times 45 \mathrm{~mm}$ (thickness $100-240 \mathrm{~mm}$ ) | Rabbet above: $20 \times 20 \mathrm{~mm} \mid$ thickness 80 mm

Glulam natural elements, single groove, type 1

Glulam natural elements, double tongue and groove, type 3

Standard dimension
Thickness:
idth:
120, 160, 200 mm
Length: $\quad 6-18 \mathrm{~m}$

## Block planks

There is hardly anything more typical of the special Alpine flair than these block planks. With their humidity-regulating heat, sound and fire protection values, they create a comfortable indoor climate. On each side, they have a ready-to-install visible surface, which allows this product to have several variations. Thanks to the ready-to-install delivery, it is easy to assemble
the components quickly and precisely

Theignt: 20 mm
Length: $\quad 6-18 \mathrm{~m}$
Length: 6-18m

## THE JOINERY SERVICE A QUANTUM LEAP!

Our joinery service centre combines traditional manual work with modern technology. It serves as an interface through which we can fully meet the needs and requirements of our customers.

Initial consultation: Your project is accepted, a plan is drafted, and the costs are calculated.

The wooden components then take shape in the joinery station
The state-of-the-art joinery station allows millimetre-precise production in no time. This enables a high degree of flexibility thanks to fast and optimal construction while keeping to the deadlines, as well as through calculable cost savings and top-quality construction elements.

HARD FACTS ABOUT THE JOINERY STATION

| DATA PREPARATION | We convert your project data into CNC machine data. <br> SEMA, Dietrich's, hsbcad and cadwork. Other kinds of <br> processing are also possible. |
| :--- | :--- |
| WOODEN ELEMENTS | max. length 18 m <br> max. height 1250 mm <br> max. width 280 mm |
| JOINERY MACHINES | Hundegger K2i 1250 ROBOT <br> Hundegger K2i 12505 axles <br> Hundegger K2 6255 axles |

## EVERYTHING UNDER ONE ROOF

With computer-assisted manufacturing, THEURL meets the highest precision and quality requirements of modern timber construction. In our assembly facilities, we carefully and expertly produce individual wooden structures measuring up to 18 m in length and 1.25 m in height. The years of experience of our employees and the high precision of the three joinery machines play an important role in this. They guarantee sustainable customer service. Specifically, everything from the realisation of the design as ready-to-install and millimetre accurate components, to the quality control at the end of processing, is covered.

## OUR JOINERY SERVICE

| CONSULTANCY | Representation of the offer. <br> Competent advice in the planning phase. <br> Calculation for the offer. <br> Preliminary calculation by means of the THEURL calculation. <br> Reliable processing and development. |
| :--- | :--- |
| DATA PREPARATION | SEMA, Dietrich's, hsbcad and cadwork. <br> Other kinds of processing are also possible. |
| JOINERY MACHINES | Hundegger K2i 1250 ROBOT <br> Hundegger K2i 12505 axles <br> Hundegger K2 6255 axles |
| WOODEN ELEMENTS | max. length 18 m <br> max. height 1250 mm <br> max. width 280 mm |
| SURFACE TREATMENTS | Chopping <br> Brushing <br> Painting <br> are optionally available from our partner companies. |
| PRE REFINING STEPS | with connectors; from the insertion of the connectors to the <br> ready-to-install constructions. |
| LOGISTICS | Timely delivery of the ready-to-install constructions <br> with prepared installation plans. |
